DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This dwelling is located close to the street on the south side of Church Lane in Texas. It is rectangular, 19 X 30 feet, with its long axis north - south, and built into the countours of the land. It is perpendicular and built into its neighbor to the east # 149, by about two feet. They share a common wall.

The house is two stories with a shingled shed roof. This roof is higher on the north and slopes south. The first story is constructed of uncoursed stone which has been painted, the second is frame and covered with aluminum siding. There is evidence of wide plates between the first and second floors on the north west corner of the building. These plates are butt joined. There is a small interior brick chimney on the east. The stone walls are approximately 22 inches thick.

The north facade is two bays wide, with a one story one bay covered stoop. There are two bays on the west facade of the main block on the first floor and three on the second. The south facade is one bay wide on the second floor, while the first has a two bay, one story porch with shed roof which has been enclosed. This cinder block alteration is two bays on the west and south.

All windows on the main block are 6/6 lite with wood sash and sills. Only those on the second floor of the north facade are original.

The dwelling is two rooms deep on the main block, while the enclosed porch on the south serves as a third. The entrance door on the north is half glass, it opens into the parlor. Stairs to the second floor are located on the west wall of this room. Windows are deeply recessed. A fireplace with wood mantel on the east wall of this room has been removed and the opening covered with paneling. The kitchen is located to the south of this room. According to the owner an open archway on the east wall once opened into # 149 on the east. This arch has been bricked in. There is also evidence in this room of tongue in groove wainscoating. There was once a window into # 149 on east side of the porch/room. This has been sealed. The upper floor of the dwelling has been divided into several small rooms.

BUILDER/ARCHITECT

Unknown

STATEMENT OF SIGNIFICANCE

This house is a good example of vernacular stone architecture with style being secondary to function. Built close to the street, two rooms deep, originally one story now two- the dwelling blends well into the streetscape on the west end of Church Lane. It is typical for the use of local, readily available and low cost material for construction.
